Company Overview

**Sylvera**

What is Sylvera?

Sylvera is the leading carbon data company in the market. We enable organizations and governments to invest in real climate action and get on track to net zero.

Carbon data for the net zero transition

Net Zero requires the greatest economic transformation modern society has undertaken. It will take an estimated capital investment - from both the public and private sectors - of $3.5 trillion annually over the next 30 years into the technology and infrastructure required to deliver a zero-carbon economy.

All organizations need to rapidly adopt science-based net zero strategies, follow the mitigation hierarchy and reduce their emissions. However, the reality is that many will not be able to fully decarbonize, because the technology doesn't exist yet. This leaves a profound gap in net zero transition plans. This is where carbon markets come in—the "net" in net zero.

Today, proactive organizations are developing fully integrated net zero plans, which include investing in high-quality credits for emissions they cannot cut and exist beyond their value chain. They will be primed to take full advantage of the net zero transition, while those that defer will experience a costly shock.

Sylvera sees the tremendous opportunity in getting the net zero transition right. That's why our mission is to incentivize investment in real climate action. With our suite of data and tools about the carbon markets and organizational net zero journeys, businesses and governments can confidently invest in, benchmark, deliver, and report real climate impact.

Platform benefits

Navigate complexity
Understand quality, risk and value in an opaque market. Keep track of evolving policy & regulation developments.

Manage risk
Shore up your due diligence. Develop a diversified carbon credit strategy and invest in the credits and companies making a real impact.

Expand investment
Stay ahead of emerging opportunities like jurisdictional REDD+ and pre-issuance investments.

Corporate Sustainability Teams
- Improve your due diligence and ensure you deliver your climate commitments with high-quality credits.

Banks, Asset Managers and Insurance Firms
- Use insights to build risk guardrails for market participation and inform portfolio investment strategy.
- Leverage data to improve insurance risk models.

Hard-to-Abate Industries
- Discover and assess investment opportunities, and quickly identify buyers for credits in your portfolio.

Professional Services, Marketplaces, Trading Houses
- Demonstrate credibility and offer best-in-class climate services to win business.
- Integrate Sylvera as quality indicator for your brokerage service.

What sets
Sylvera Apart

Sylvera's **4 pillars** of assessment

The Sylvera Carbon Rating is based on a deep and holistic analysis of a project's **carbon** accounting, **additionality** and **permanence**. The **co-benefits** the project brings to local communities and the environment are also assessed. Our ratings assess the likelihood that the credits issued by a carbon project have delivered on their claims of avoiding or removing one metric ton of carbon dioxide (tCO2) or other greenhouse gases (GHGs).

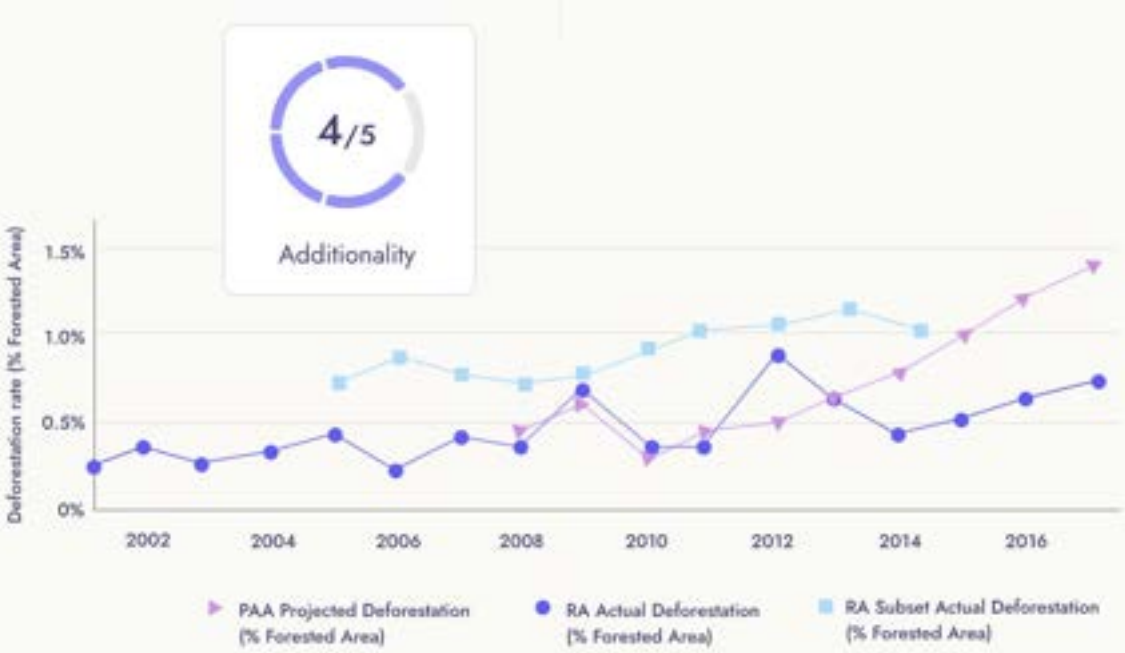

Sylvera Rating: **A**

90%	4/5	3/5	5/5
Carbon Score	Additionality	Permanence	Co-benefits

Transparency & rigor at the core

The real strength of our carbon credit ratings lies in our **bottom-up, project-type-specific frameworks**. We develop specific frameworks for each project category because it is the only way to accurately assess quality across fundamentally different categories of activities. All **frameworks are peer-reviewed** by a committee of experts and carbon market stakeholders – including project developers & registries – to ensure scientific consensus. We publish our frameworks so buyers understand exactly what we test and how we do it. Learn more.

INCENTIVIZING INVESTMENT IN REAL CLIMATE ACTION

Sylvera

A suite of tools
for real climate impact

Carbon Ratings

Discover, compare and track carbon credits available in the VCM. Project ratings include in-depth assessments and discrete co-benefits evaluations.

*We do not sell credits and we do not accept payment from developers to rate their projects.

Carbon Credit Analytics

Benchmark and de-risk your carbon credit strategy based on the latest market trends and retirement data. Monitor your suppliers' and portfolio companies' carbon credit activities so you can actively manage risk.

Jurisdictional Intel

Sylvera's JREDD+ Intelligence Product Suite supports new and experienced market participants in understanding and navigating the complex JREDD+ landscape to leverage the opportunities and tackle the risks arising from this soaring type of project.

Pre-Issuance Assessments

Proactive buyers have started to invest in early stage projects in order to procure high-quality credits through long-term offtake agreements. Our pre-issuance assessments evaluate project quality and risks, analyze financial and economic scenarios and provide targeted insights and recommendations to assist our clients in deal negotiation.

Businesses and governments around the world rely on Sylvera's data and tools to confidently invest in, benchmark, deliver and report real climate impact.
